CLEP College Algebra, 8th Edition	**REA**

ISBN: 978-0-7386-1151-8

Additional book will be provided for free by instructor for fall, CLEP book will be used in spring.

Yearly tuition: $320 **Copy fees:** $20 (includes copy and videos)

Course Description: Senior Math/CLEP College Algebra is for students who are “good” in math but will not be pursuing a math/science degree and will not be taking calculus but will need to take college algebra. We will focus on higher math skills that need to be mastered and math found in what would be called Senior Finite Math; basically everything you need to know about High School math before entering the real world.

There will be assignments throughout the year that will focus the student on prepping for the College Algebra CLEP, so that course can be mastered before ever leaving High School. This is the class to take to fulfill the 4th year of math requirement, especially if one has taken the below prerequisites and Advanced Algebra with Trig or Pre-Calculus, and helps students be fully prepared for the CLEP test, college algebra, ACT or SAT.

Prerequisites for this class: Mastery of Algebra 1, 2 and Geometry.

This class is only for Seniors.

Average study time: 4-5 hours per week
